

Dimensional Specifications For Oxygen Bar

- 4 station bar fits comfortably into a 10' wide by 6' deep space.
- Requires one 110 volt receptacle and draws less than 10 amps at maximum. The noise volume is very low, less than 20 db's.
- The Bar is self-contained and manufactures the oxygen needed to operate the bar on site. No oxygen is stored in the bar. The bar uses oxygen generators not tanks, so there is no risk of fire or explosion!
- Bar weighs approximately 250 pounds with generator. Shipping crate weighs 300 pounds. Crate dimensions are 4W ~ 4' x 8'.
